Measurements in mm  
**Installation below a worktop**

Observe the installation dimensions and the installation instructions when installing below a worktop

**A:** Electrical connection

Note:

A worktop overhang of up to 50 mm over the drawer is possible, but then the removal of the water tank while the steam drawer is operating is not possible

Measurements in mm  
**Installation underneath a hob**

Observe the installation dimensions and the installation instructions when installing in the unit

If the appliance is installed under a hob, the following minimum dimensions must be adhered to (including substructure, if applicable)

|                            | Tabletop installation or<br>flush installation |          | Tabletop installation or<br>flush installation |
|----------------------------|------------------------------------------------|----------|------------------------------------------------|
|                            | <b>A</b>                                       | <b>B</b> | <b>C</b>                                       |
| Induction hob              | 30/30                                          | 5        | 200/201                                        |
| Full surface induction hob | 40/40                                          | 5        | 210/211                                        |
| Gas hob                    | 32/43                                          | 5        | 190/193                                        |
| Electric hob               | 30/30                                          | 5        | 190/197                                        |

**A:** Thickness of work surface recommended in the hob installation instructions

**B:** Required distance between hob and steam drawer

**C:** Required distance between drawer shelf and bottom of worktop

Note:  
Pay attention to the hob installation instructions

Measurements in mm

## Installation on walls adjacent to a cabinet

Note:

If the walls on both sides of the cabinet are deeper than the cabinet, a distance of at least 110 mm must be maintained

Any distance smaller than this may affect installation of the appliance
